TOILET BOWL AND TANK

Key Insight

Vietnam has strong ceramic and porcelain manufacturing capabilities, but toilet bowls and tanks are still largely sourced from China. The key gap is not ceramic forming, but product engineering, tooling, component integration and established toilet-system supply chains. This makes China more competitive for complete bowl and tank production.

TOILET SEAT

Thailand

Key Insight

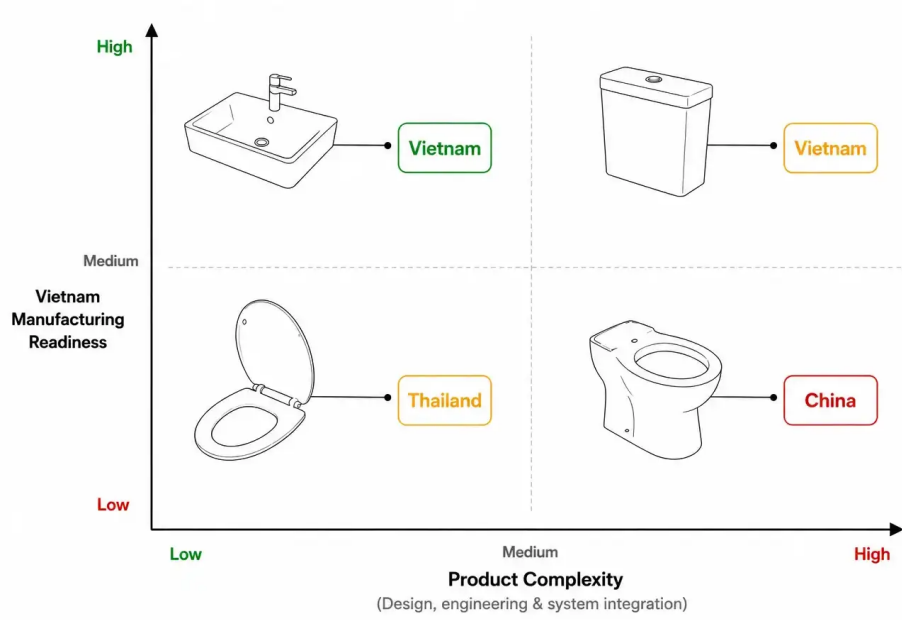

Vietnam's strength in ceramic manufacturing does not extend across the complete toilet supply chain.

Toilet seats are currently sourced from Thailand, highlighting a gap in Vietnam's local ecosystem for non-ceramic toilet components.

BATHROOM SINK

Vietnam Plumbing Market Positioning Matrix

**Indicative positioning based on manufacturing and supply-chain complexity.*

Key Insight

Bathroom sinks represent one of Vietnam's strongest positions within the ceramic plumbing supply chain. Vietnam has established capabilities in ceramic and porcelain production, with manufacturers already serving export markets. Compared with toilet bowls and tanks, sinks generally require simpler product geometry, tooling and functional testing. This makes bathroom sinks a more natural entry point for Vietnam's plumbing manufacturing sector.

SEA SUPPLIER LANDSCAPE

Category	Company	Core Capability	Profile	Contact
Toilet bowl and tank	Guangdong Xiang*** Technology Co. / Guang*** Gao*** Ceramics Industries	Ceramic Slip Casting · Glazing · Kiln Firing	 View Profile	Restricted
Toilet seat	Heng*** Home Furnishing	Injection Molding · Compression Molding · Hinge Assembly	 View Profile	Restricted
Bathroom Sink	Ki*** Home Jsc	Ceramic Casting · Glazing · Kiln Firing	 View Profile	Restricted

 Key Insight

Highly Recommended Vendors*.

**Detailed supplier profiles and contact information are available upon request.*
